

Amendments to the Claims:

Please cancel Claims 1 through 10, without prejudice to or disclaimer of the subject matter recited therein; and add Claims 11 and 12, as follows.

Claims 1 through 10 (Cancelled).

11. (New) A developer supply container detachably mountable to an image forming apparatus, said developer supply container comprising:

a container body having a developer containing portion configured and positioned to contain a developer;

a discharge opening, provided in said container body, configured to permit discharging of the developer in said developer containing portion;

a gas container storing a compressed gas;

a plate-like member, disposed at a position between said container body and said gas container, and configured to move toward said discharge opening to discharge the developer in said developer containing portion through said discharge opening;

a switch portion, operable from the image forming apparatus, configured and positioned to release the compressed gas from said gas container so that said plate-like member moves toward said discharge opening; and

an urging portion configured and positioned to urge said switch portion to stop the release of the compressed gas from said gas container.

12. (New) A developer supply container according to Claim 11, wherein an internal pressure of said gas container is 10 - 150KPs.
